

One Source, Two Outputs

Deck by default, A4 notes with `–input mode=note`

2026-07-06

01 Motivation

02 Shared Components

Motivation

One File

The same source can be compiled as a 16:9 slide deck or as an A4 note handout.

One File

The same source can be compiled as a 16:9 slide deck or as an A4 note handout.

The note output keeps the complete content and drops slide-only chrome.

Deck mode

Uses `xwysyy-pre` , touying slides, section pages, headers, footers, and animations.

Note mode

Uses `xwysyy-note` , A4 pages, ordinary headings, and the same content blocks.

Shared Components

Theme-Aware Blocks

`textbox` remains available in both outputs. In note mode it uses the active theme state as a quiet callout color.

Table 1: Dual-output degradation rules

Slide-only layout	Note-mode degradation
<code>title-slide</code>	document title block
<code>outline-slide</code>	<code>#outline()</code>
<code>new-section-slide</code>	ordinary level-one heading
<code>image-slide</code>	figure
<code>end-slide</code>	centered ending block

Image slide becomes a figure in note mode.

End

Compile with `typst compile --root . --input mode=note examples/dual-source.typ`.
